

HORIZONTAL EARTH BORING MACHINE

Economical and versatile boring machines!

The "Prairie Dog" Model 1800 allows a single operator to bore holes from 2 to 28 inches in diameter, in lengths of up to 300. The Model 1800TW is a versatile boring machine designed to be inexpensive to operate and requires little maintenance.

Whether you install cables or pipelines, digging trenches through existing structures is expensive and time consuming. The "Prairie Dog" line of products allows you to bore holes under existing structures easily and economically.
